

PROVEN IN THE FIELD

Sixty systems built. **Zero** abandoned.

Of 60 systems built on this living-sand-and-sunlight design in remote South American communities, every single one is still in daily use.

now built for UK off-grid sites

HOW IT RUNS

Powered by **gravity** and **sunlight**.

No pump. No chemicals. 12 V solar and a battery — it keeps running when the mains and the grid don't.

day & night, solar + battery

THE HONEST COMPARISON

Four ways to drink rainwater. **Only one does it all.**

	KÄLLA	REVERSE OSMOSIS	BOILING	JUST RAINWATER
Free of pathogens	✓	✓	✓	~
Removes sediment & dirt	✓	✓	✗	✗
Keeps natural minerals	✓	✗	✓	✓
Nothing to buy or replace	✓	✗	✗	✓
Runs off-grid on solar	✓	✗	~	✓

RO strips the minerals back out and its filters need regular changes. Boiling burns energy every time. Untreated rainwater varies with your roof and the season — Källa makes it reliably safe.

LIVING BIOSAND + UV-C PURIFICATION · THE NUMBERS

One unit. **60–80 litres a day.** A whole household.

10+ YRS FILTER LIFE

99.9% FILTRATION + UV-C

12 V SOLAR + BATTERY

~0.4 L/MIN GRAVITY-FED

Need more? Källa scales by the unit — one unit covers roughly 15–40 people's drinking and cooking water.

THE LIVING FILTER

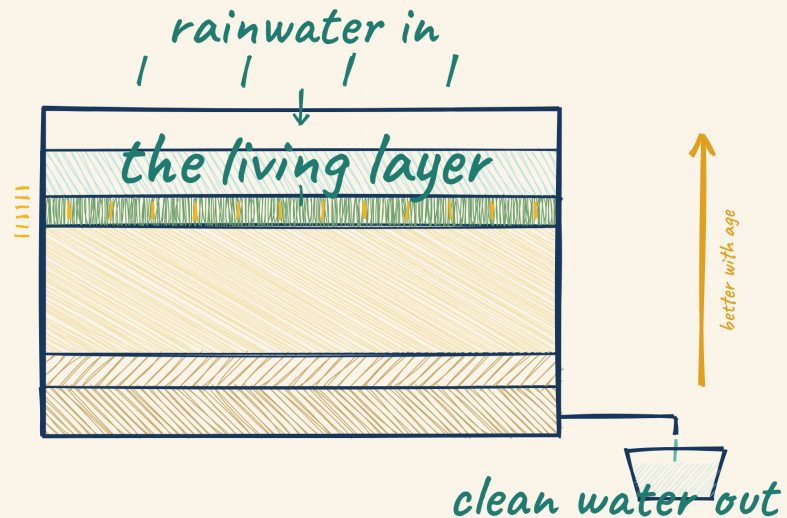

The only water filter that improves with age

A living layer of helpful microbes cleans the water as it passes. No cartridges. Nothing to replace. 10+ year filter life.

NO CARTRIDGES

GRAVITY-FED

10+ YEARS
